

NEXUM NG™

DRIFT REDUCTION AGENT, CANOPY PENETRATING AGENT & DEPOSITION AID

NEXUM NG is formulated to enhance pesticide performance by improving spray solution deposition and coverage while reducing driftable fines.

WHAT MAKES NEXUM NG BETTER:

IMPROVES SPRAY PATTERN

- Maintains integrity of spray pattern
- Reduces fine particles and spray drift
- Increases spray deposition and canopy penetration

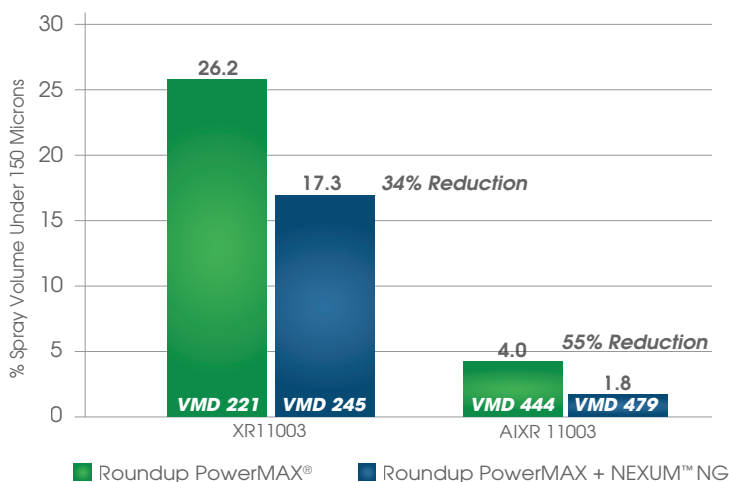

ENHANCES NOZZLE PERFORMANCE

- Keeps spray droplet size in specified effective range
- Complements air induction and flat fan nozzles

EASY TO USE

- Convenient low-use rates
- Can be mixed through inductors or over the top
- Mixes quickly with minimal agitation

NEXUM NG IMPACT ON DRIFTABLE FINES (<150 MICRONS)

Volume median diameter (VMD) is the point where half the volume of spray is droplets larger than the VMD and half the volume is smaller.
Low-Speed Wind Tunnel @ 43.5 psi - 2015

USE RATES:

- 4-6 oz. per acre in 5-20 GPA applications
- 6-8 oz. per acre in 20-40 GPA applications
- 8-10 oz. per acre in >40 GPA applications

PACKAGING:

- 2 x 2.5 gallons per case
- 275 gallon minibulk
