

PRECISIVE™

Nonionic Surfactant, Drift Reduction Agent And Deposition Aid

PRECISIVE™ is an APE/NPE-free, high load nonionic surfactant with built-in drift reduction and deposition technology. PRECISIVE is formulated to provide a high level of crop safety, making it ideal for fungicide and herbicide applications in corn pre-tassel.

University replicated field trial in Central Illinois, Precise™ spray application June 12, 2023

USE RATES

Ground: 1–4 pt / 100 gal (0.125-0.5% v/v)

Aerial: 2–4 pt / 100 gal (0.25-0.5% v/v)

Drones / UAVs: 4 pt / 100 gal (0.5% v/v)

PACKAGING

2 x 2.5 gallons per case

275 gallon minibulk

CERTIFICATIONS

FEATURES

APE/NPE-free for improved crop and environmental safety

Creates the right-sized droplets for reduced drift and increased canopy penetration

Minimizes off target movement

Great for use with PRE-VT fungicide applications in corn

Excellent partner with modern corn and soybean herbicide tank mixes

True 90% surfactant load, which is practically unparalleled in the market today

Labeled for aquatic use

Approved for use with Enlist One® & Enlist Duo®, Engenia®, Tavium®, and Xtendimax®

PRECISIVE increased fungicide performance and yield with pre-VT applications.
