

# HYDRALINK™

## SEED-APPLIED WATER MANAGEMENT

**HydraLink™** is a new, innovative seed-applied water management product formulated to provide an optimal moisture environment around the seed for improved germination and emergence, stand establishment and yield. With an improved moisture environment, **HydraLink** also enhances the performance of other seed-applied inputs. It is particularly beneficial when used in combination with seed-applied nutrition products such as Wuxal® Terios Zn<sup>+</sup>, Wuxal Terios Mn<sup>+</sup> and Wuxal Terios, where it provides for improved nutrient uptake and use.

### HYDRALINK FORMULATION

- Low use rate liquid formulation that provides an optimal moisture environment around the seed
- Easy to handle, low viscosity formulation with good temperature stability
- Excellent slurry compatibility with most seed treatment pesticides and other seed-applied products
- Ideal complement to seed-applied nutrition products on corn, soybeans, and wheat, as well as rhizobia inoculant on soybeans

### PACKAGING

- 2 x 2.5 gallons per case

### USE RATE

- Corn – 1.0-2.0 fl. oz. per 100 pounds of seed (0.5-1.0 fl. oz. per unit)
- Soybean – 1.0-1.5 fl. oz. per 100 pounds of seed (0.5-1.0 fl. oz. per unit)
- Wheat – 2.0-4.0 fl. oz. per 100 pounds of seed (1.0-2.0 fl. oz. per unit)
- Sorghum: 2.0 – 4.0 fl. oz. per 100 pounds of seed (1.0 – 2.0 fl. oz. per unit of seed)
- Cotton: 3.0 – 4.0 fl. oz. per 100 pounds of seed (1.5 – 2.0 fl. oz. per unit of seed)
- All other crops: 1.0 – 4.0 fl. oz. per 100 pounds of seed depending on size
